

## Self-Directed Investing Plus

# Example profiles Self-directed Investing Plus

The portfolios you see in these example profiles are fictitious. The transactions are a simulation that could take place as *maintenance transactions* in a year. This means that these transactions do not comprise all the transactions underlying the *construction* of the portfolio. The figures between brackets refer to the explanation on the last page.

## Example Profile: A

This fictitious example profile gives an indication of the investment charges for one year. The amount of assets invested is €50,000. Investments are made in domestic equities, investment funds and ETFs (trackers). We assume 12 transactions per year.

### Assets invested: € 50,000

Here you see the costs contained in the stated investments. These costs are not paid separately, but are processed by the fund manager in the price of the relevant investment.

Equities are exchange-traded investment products that carry no intrinsic costs. Investment funds and ETFs do carry intrinsic costs for the management of the product.

Here you see the product costs again but this time totalised per type of cost. Costs are expressed in euro and as a percentage of the invested assets.

1 These are the charges as stated by our external data provider, Six Telekurs. The charges differ per fund provider and investment fund.

#### 2 Ongoing charges

You also pay charges incurred by an investment fund. Such as the management fees, administration fees and marketing and distribution expenses. These charges are included in the price of the investment fund and are set by the fund. The management fees and administration fees are set out in the Key Investor Information Document (KIID) of the investment fund. The Key Investor Information can be found via [abnamro.nl/beleggingsfondsen](http://abnamro.nl/beleggingsfondsen)

#### 3 Transaction charges in funds

Many fund managers actively manage their fund and trade accordingly. The fees for the buy and sell transactions within the fund are included in the price of the investment fund. These are the charges as stated by our external data provider, Six Telekurs. The charges differ per fund provider and investment fund.

#### 4 Other charges

'Other charges' comprise the swing price and the bid/ask spread.

Swing price: Swing pricing is a technique for eliminating the negative impact of investors entering and exiting the fund for existing or incumbent shareholders in a fund. The buyer therefore pays an extra levy on top of the price of the fund to cover the costs caused by his transaction.

Bid/ask price: the ask price is the amount for which you can buy a share. The bid price is the amount for which you can sell a share at that time. The difference (the spread) comprises the charges that you pay. We use the following bid/ask spreads in these Indicative Profiles: Domestic and Foreign Equities and Closed End Investment Funds: 0.0439%. Open End Investment Funds and ETF Trackers: 0.015%. Turbos: 1.00%. Options: 2.00%.

#### 5 Turbos

Turbos are leveraged products enabling investors to respond rapidly to market developments. In general, therefore, Turbos are not held for very long in your

portfolio. Under European legislation, however, providers of Turbos are required to indicate the impact of the charges on the return on an annual basis. If you compare the Key Investor Information Document (KIID) of a Turbo with our example profile. The KIID also states the charges of Turbos. These consist largely of one-off charges and ongoing charges. With Turbos, the one-off charges consist of the bid-ask spread. The ongoing charges of Turbos are better known as financing charges. The KIID shows a very high percentage of charges. This is because the KIID assumes an imaginary situation where you buy and sell the Turbo each day, 365 days per year. In reality, you only pay the daily charges over the period that the Turbo is held in your portfolio. In our indicative profile, these are the bid-ask spread on the purchase on day 1 plus the bid-ask spread on the sale on e.g. day 20 plus the financing charges from day 1 to day 20 inclusive (= 21 days). The result is roughly equal to the [2.17%] you see in the indicative profile:  $(435.21\%/365) + (186.60\%/365) + (8.20\%/365 * 21) = 2.17\%$ .

#### 6 ETFs

An exchange traded fund (ETF) is comparable with an investment fund. The investments in an ETF are spread, just as with investment funds. Usually an ETF tracks an index, such as the AEX or Dow Jones. Hence the name index investing. But ETFs can also track a certain 'basket' of investments from a certain sector or region. The difference with investment funds is that an ETF tracks the price of an index or basket, while an investment fund tries to outperform the index or basket. As ETFs track the price, they are also known as 'trackers' or passive funds.

#### 7 Exchange charges foreign equities

If you place an order for an investment product that is traded in a currency other than the euro and the order is executed, We then convert the order amount into euro. The bank uses the real-time middle rate for the conversion of the foreign currency. A charge is payable for the conversion. This indicative profile only contains foreign equities purchased in USD. How these charges are calculated can be seen at <https://www.abnamro.nl/nl/prime/beleggen/service/beleggingsorders/voorbeeld.html>

*Please note: entry and exit charges apply to various investment funds. See the Key Investor Information (KII) for more details.*

#### US Securities Law Disclaimer

ABN AMRO Bank N.V. (ABN AMRO) is not registered as a broker, dealer or investment adviser in the meaning of the US Securities Exchange Act of 1934 and the US Investment Advisers Act of 1940, as amended from time to time, nor in the meaning of other applicable US state statutes. Except pursuant to an applicable exemption under the aforementioned legislation, ABN AMRO's investment services, including but not limited to the products and services described herein and any related advisory services, are not intended for US persons in the meaning of the aforementioned legislation. This document and any copies may not be sent or taken to the United States of America or provided to US persons. Without limiting the generality of the foregoing, the offering, sale and/or distribution of the products or services described herein is not intended in any jurisdiction to any person to whom it is unlawful to make such an offer, sale and/or distribution. Persons into whose possession this document or any copy thereof may come, must inform themselves about, and observe, any legal restrictions on the distribution of this document and the offering, sale and/or distribution of the products and services described herein. ABN AMRO cannot be held responsible for any damage or losses that ensue from transactions and/or services in defiance with the aforementioned restrictions.
